Statement Regarding Operating Procedures

Green Eagle Networks, Inc. ("Carrier") has established operating procedures that ensure compliance with the rules and regulations of the Federal Communications Commission which govern the protection of customer proprietary network information (CPNI), 47 C.F.R. Sections 64.2001-2009.

Carrier has a system in place in which the status of each customer's CPNI approval can be clearly established prior to any use disclosure or access.

Carrier trains its employees as to when they are and are not authorized to use CPNI. Carrier has established an express disciplinary process for any employee who does not adhere to Carrier's procedures.

Carrier maintains a record, electronically or in some other manner of its own and its affiliates' sales and marketing campaigns that use their customers' CPNI. The carrier maintains a record of all instances where CPNI was disclosed or provided to third parties, or where third parties were allowed access to CPNI. The record includes a description of each campaign, the specific CPNI that was used in the campaign, and what products and services were offered as a part of the campaign; the record is retained for a minimum of one year.

Carrier has established a supervisory review process regarding carrier compliance with the Commission's CPNI rules for outbound marketing situations and maintains records of carrier compliance for a minimum period of one year. Specifically, sales personnel must obtain supervisory approval of any proposed outbound marketing request for customer approval.

The Carrier has an established procedure that written notice within five business days must be provided to the Commission of any instance where the opt-out mechanism did not work properly, to such a degree that the consumers' inability to opt-out is more than an anomaly.
